Director	Trevor Tuffin	948-3126
Director	Dr. Lester Mills	972-6218
Director	Herman Andreasen	997-8757
Editor	Keith Parizek	996-1013

January Meeting

✓ The regular meeting of PAS will be 8:00 PM on January 22, 1988 at Room 102, Science building at Phoenix College. The speaker will be Bill Romanashin of the ASU astronomy department and a member of the Halley Comet Watch. His subject will be "Galaxies and Quasars". This will be another fine program and all members should be certain to attend.

February Meeting

✓ The February meeting will be at 8:00 on February 26, 1988 at Room 102, Science building at Phoenix College. David Levy, of the University of Arizona astronomy department, will be speaking on "Comet Hunting". He is well qualified as he has recently discovered three comets!

After the David Levy lecture, David will talk to us about the possibility of getting Dr. Clyde Tombaugh, discoverer of the planet Pluto to come to Phoenix to lecture to us in April. All club members should again be present as this will involve us all.

These are quality programs and each of us should attend and bring some other interested friends to hear these fine lecturers.

We note with regret that one of our longtime members has passed away. Helen L. Bramwell, wife of William and mother of Frank died December 26, 1987.
