# PASTIMES

PHOENIX ASTRONOMICAL SOCIETY -- FOUNDED 1948

Carl Berglund  
from the Jet Propulsion Laboratory  
in Pasadena, California  
will be speaking with the  
Phoenix Astronomical Society  
of his many years of experience with the  
Galileo mission to Jupiter.

Carl has been a mechanical engineer  
with JPL for the duration of the Galileo program.  
His presentation will include several video  
presentations of JPL, Galileo, computer simulations  
and the famous "L.A. the Movie".

All members, relatives and friends are  
welcome to attend the meeting.  
A large attendance will greatly enhance the  
final and perhaps most exciting  
meeting of the year.

Bring your questions and curiosity  
to Brophy College Preparatory  
Friday, the 18th of May  
at 7:00 pm.
