Astronomy Fans: YOU Are Invited to a Free Lecture!

Phoenix, AZ – The Phoenix Astronomical Society PASAZ.ORG is proud to announce that our own **Dr. Alex Woronow** will be our guest lecturer **February 3, 2022**, during our 7:00 p.m. ZOOM meeting. Please join us via

<https://us02web.zoom.us/j/82279362985?pwd=OEIHCnVaWlJrOVMyZjJcTRaZEJIUT09>

Dr. Woronow's lecture is titled "*The Stellina Telescope—The future of amateur astronomy has arrived.*" A new generation of amateur astronomy is upon us: Enter the Stellina! Set it down wherever you want; the Stellina is light, compact, and portable. Insert a battery, turn it on, and it obtains its latitude and longitude, points upward, focuses, takes a sky image, and plate-solves to orient itself to the sky—all hands-off. Select a target, and it slews to it, centers the target and checks the focus, and then begins imaging without the aid of add-on software. This presentation will cover the above features and show some early images captured with this remarkably advanced amateur instrument.

Dr. Woronow has an A.B. degree in Astronomy from Berkeley, an M.S. in Geology from U. Houston, and a Ph.D. from Harvard.

This lecture is open to the public, so please tell a friend!
