Phoenix Astronomical Society

FOR IMMEDIATE RELEASE

Telescopes, Binoculars and the Naked Eye

Tools to View the Universe with the Phoenix Astronomical Society

Phoenix: The Phoenix Astronomical Society (PAS) is proud to announce its Fall activities are under way. PAS conducts monthly lectures at the Paradise Valley Community College and workshops on how to use telescopes or what to buy.

PAS, through the cooperation of the City of Phoenix Parks and Recreation conducts monthly Star Parties, an event where PAS members set up their telescopes in city parks for the public to enjoy seeing night sky objects such as the planets, star clusters and of course our closest neighbor the moon.

With over one hundred and fifty members, this nonprofit 501c3 organization also provides scholarships to students studying astronomy or a related field. To learn more about our events go to www.pasaz.org

Our members are amateur and professional astronomers, teachers, learners, oldsters, and youngsters. Founded in 1948, we are interested in telescopes, binoculars, astrophotography, planetaria, astronautics, sky lore, astrogeology, NASA, celestial navigation, and all astronomy-related topics.
